## 1 LAWN MAINTENANCE

A weekly detailed service for your property including mowing weed whacking, edging, and cleanup. Separate your property FROM THE REST with a clean cut, freshly trimmed edges, and weed free curbs and cracks. YOUR Consistently well manicured lawn will have all of your neighbors "Green with Envy"

## 2 CLEAN UP

A thorough and detailed Fall or Spring cleanup includes clearing of all leaves, sticks, and debris. This service also includes pruning, cutting back perennials, and clearing gutters of debris for winter or garden and mulch bed prepping for Spring. Ultimately, making your property clean and fully prepped for a healthy season to follow.

## 3 LANDSCAPE DESIGN

Not sure what to do with your landscape? Our team has the expertise to make your dreams a reality. Our goal is to create a landscape that is well balanced and a unique style just for you, all while being proportionate to your property.

## 4 LANDSCAPE INSTALL

This is where we make it happen! We start bed preparation and install plantings including annuals and perennials, shrubs, and trees. Once the plantings are installed, mulching for weed suppression, moisture conservation, and the prevention of soil erosion makes it look great, but has a purpose too!

## 5 LANDSCAPE MAINTENANCE

You did it! Your landscape is exactly how you envisioned, but now its time to maintain it. Things like weeding, trimming shrubs, and mulching annually are crucial to maintaining your curb appeal. We can get you on a regular maintenance schedule so you don't have to worry about a thing!

## 6 HARDSCAPE

Another element to add to your landscape. It provides definition and a sense of organization to the natural areas and features. Some examples of materials are stone, brick, pavers, metal, and wood. There are many options such as borders, retaining walls, pavers, fire pits, and even mailboxes. A well designed landscape is well balanced between the two elements, and to not have too much of one or the other.

## 7 LAWN RENOVATION

Aeration, Dethatching, Sod Installation and our Fertilizer Program are just some of the ways we can help you give your lawn a total and complete makeover.

## 8 TREE SERVICE

Keep your trees maintained with clippings and trimmings when necessary. Green With Envy also handles any removal of any unwanted or dying trees and stumps from your property.

## 9 SNOW & ICE MANAGEMENT

We will make sure your business is safe and clear throughout a storm. Our services for before, during, and after a storm ensure that your parking lot, walkways, and steps are safe for you and your customers.
